8. Focus of the TEQIP Event (Brief Purpose /Theme etc):

The growth of the Indian economy lies on entrepreneurs. There is a need for developing entrepreneurship among the engineering college students. In addition to the students exposed to engineering education, they should be equipped with the entrepreneurship skills through promotion schemes and program like business incubators. The business incubator program should develop young entrepreneurs. This not only offers self-employment but also teaches to earn at young age. The potential skills of the students should be identified and tap their knowledge and mould them to start their own business after their engineering education. Looking at the need of the topic the workshop on understanding entrepreneurship was organized on 14th and 15th of September,2018 in the department of mechanical engineering to make the young students understand what actually Entrepreneurship is.

9. Participants' Feed Back statistics No.: 52
